

Akilkumar Reddy

Devops and Data Migration specialist | akilkumar003@gmail.com | [+91 8179684659](tel:+918179684659) | [LinkedIn](#)

Professional summary

Experienced Senior Software Engineer specialized in DevOps tools and Data Migration solutions. Skilled in automating deployments and Application Integration. Proficient in designing, building, and maintaining ETL pipelines. Adept at collaborating with cross-functional teams to achieve project milestones and deliver high-quality software solutions.

Work Experience

Senior Software Engineer, IDEMIA

April 2023 - Present

Chile ePP & eID: Data Migration

- Addressed complex challenges related to requirement gathering and solution design to ensure streamlined project execution.
- Designed and implemented automated migration processes to enhance efficiency and minimize downtime.
- Coordinated and collaborated with international teams, ensuring effective communication and goal alignment across multiple time zones and cultural differences.
- Led the successful migration of 140 million records, including data cleansing activities, ensuring data accuracy and integrity.

System Integration Engineer, IDEMIA

October 2019 - April 2023

UIDAI Aadhar: Java Application Performance Testing and Tuning

- Conducted in-depth performance testing and analysis for Java-based applications.

Phillipines National ID: ELK Stack Implementation & Application Integration

- Designed, developed, and implemented ELK (Elasticsearch, Logstash, Kibana) stack solutions to monitor business logs.
- Integrated multiple applications as part of a key product delivery effort.

- Managed application deployments in Openstack environment
- Automated deployment processes using Ansible scripts, reducing deployment time and improving consistency.

Nepal ID: ELK Stack & Devops activities

- Successfully implemented ELK Stack solution to generate Business Reports and monitor system logs.
- Managed application deployments in Openstack environment and Production.

Nepal ePP: Data Migration & Devops activities

- Managed Kubernetes (K8S) clusters, ensuring their availability and reliability for application deployments.
- Designed, developed, and executed a Migration Tool overseeing end-to-end lifecycle management.
- Successfully migrated approximately 7 million records from a flat data model source system to a person-centric data model destination system.
- Maintained data integrity, accuracy, and consistency during the migration while minimizing downtime.

Technical Skills

- Programming & Tools: Python, Ansible, Shell Scripting, Jenkins, Oracle SQL, Apache Nifi, Grafana, Prometheus, PLSQL, Terraform
- Cloud & Containerization: Openstack, Kubernetes (K8s), Docker
- Data Migration: Data cleansing, Data integrity validation, Requirement Analysis
- DevOps Practices: Handling Deployments and Application Integration, CI/CD pipelines

Education

Bachelor of Engineering in Electronics and Communication

Sai Vidya Institute of Technology
2015 - 2019
